

# The PT-25 valve machine just got smarter...

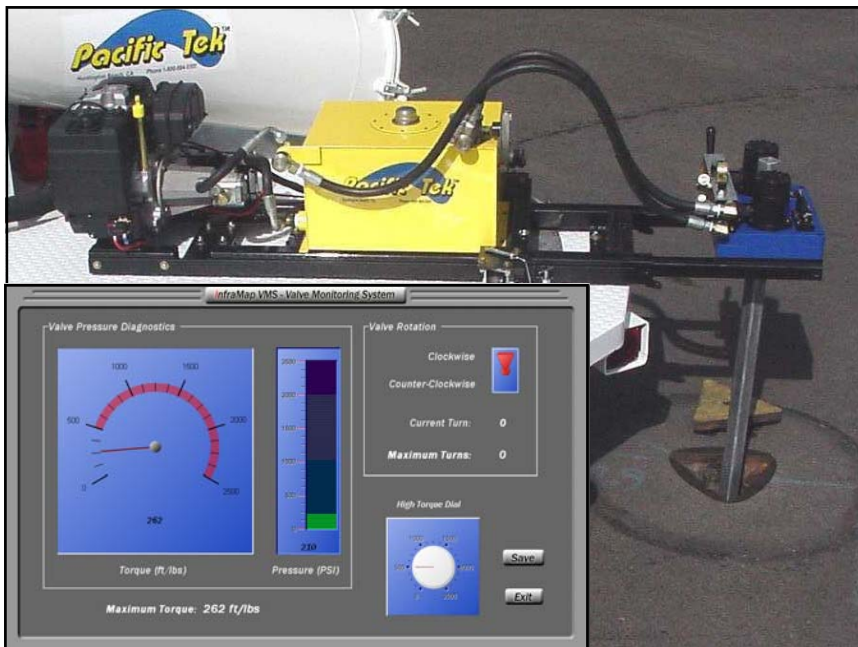

Now you can automatically capture valve information from the PT-25 directly into a pen-based computer or laptop. Valve locations and attributes are clearly displayed with an easy to use interface. System navigation is a breeze with built-in GPS. Notifications and valve data are automatically sent to the office using wireless technology.

Whether you have an existing GIS in place or need to start collecting asset information now, this is the ultimate field solution.

- **Automatically record turns and torque**
- **Essential valve information at your fingertips**
- **Complete GPS navigation system**
- **Transmit information wirelessly**
- **Retrofit your current PT-25**
- **Works with your existing GIS (Geodatabase)**
- **Data collection services available**

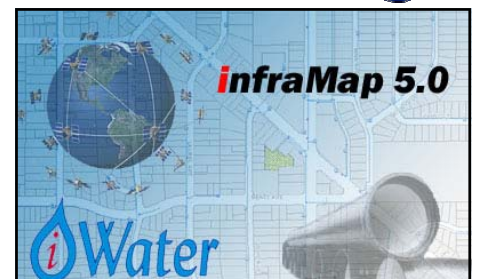

Distribution Valve				
Operational Status	Diameter	Valve ID	# of Turns	Operation Comments
New Water Line	12	E7-026	39	Normally Closed
Assembly Type	Close Direction	Current Position	Depth to Nut	<input type="checkbox"/> Left Closed <input checked="" type="checkbox"/> Normally Closed <input type="checkbox"/> No Full Closure
Gate Valve	Right	Open	14	General Notes
Function	Bearing: 47 deg. NE		Distance: 15 Feet
